## PERSONAL PROJECTS

**Project Name: Mock Builder (2023-2024)**

- Developed AI-powered mock data SASS(Software as Service) generator enabling custom dataset creation and editing
- Built collaborative web platform for streamlined test data management across teams
- Implemented flexible data customization algorithms to generate realistic sample datasets
- Link to Project: <https://www.mockjsonbuilder.shop/>

**Project Name: Creatify (2023-2024)**

- Built comprehensive design editor featuring drag-and-drop interface, template customization, text manipulation, shape tools, and real-time autosave functionality
- Implemented AI-powered features including background removal, text-to-image generation, and smart layout suggestions for enhanced user experience
- Developed robust user management system with authentication, team collaboration, and subscription-based payment processing for monetization
- Link to Project: <https://creatify-five.vercel.app/>

**Project Name: Watch Tower (2023-2024)**

- Engineered a SaaS notification system enabling real-time Discord alerts for critical business events including bug reports, sales transactions, and user signups
- Developed customizable webhook integration allowing users to configure alert preferences, notification templates, and event filtering mechanisms
- Implemented secure user dashboard for managing notification rules, viewing analytics, and monitoring delivery status across multiple Discord channels
- Link to Project: <https://www.watchtowerapp.shop/>

**Project Name: Twitter Craft (2023-2024)**

- Developed an AI-powered Twitter bio generator that creates engaging, personalized bios based on user prompts, integrating Gemini API for natural language processing
- Launched user-friendly tool helping users craft compelling Twitter bios within seconds
- Link to Project: <https://twitter-craft.vercel.app/>

**Project Name: Color Palettes AI (2023-2024)**

- Built an AI-powered color palette generator that creates harmonious color schemes from user's website descriptions, enabling seamless export and quick application to web projects
- Launched intuitive tool helping designers and developers find perfect color combinations through natural language prompts
- Link to Project => <https://color-palette-ai.vercel.app/>

---

**PROJECTS – ACADEMIC**

---

**Project Name: Small Version of Google Drive called as DOCV AULT Semester VIII, 2019-2020**

- Project conceptualized in conjunction with the idea of building a small storage website.
- Objective - To make a user friendly web ,sort the users files and folders in one place.
- Projected coded on Html, Css, JS, React, Npm , Firebase Google.
- Completed under the guidance of Dr D.B.Kadam.
- GitHub Code Link => [https://github.com/Zaidbhati10114/Google\\_Document\\_Clone](https://github.com/Zaidbhati10114/Google_Document_Clone)

**Project Name: WildFire Tracker Semester VII, 2019-2020**

- Project done conceptually with Api's and get hands-on experience on Api powered websites.
- Ideation to create a website shows natural events such as wildfire, volcanoes, storms and plot them on google maps ● Projected coded on Html, Css, JS, React,Google Maps Api,Nasa Api.
- Completed under the guidance of Prof. Rohini Onkare.
- GitHub Code Link => <https://github.com/Zaidbhati10114/wildfire-tracker>

**Project Name: Text Editor for Html, CSS and JS | Code Space Semester VII, 2019-2020**

- Project created for be proficient in Html, CSS,JS
- Concepts of putting all together in one project used to achieve best results
- Projected coded on Html,Css,JS,Code-Mirror Library
- Completed under the guidance of Prof.Bharat Kulkarni.
- GitHub Code Link: <https://github.com/Zaidbhati10114/code-space>

---

**TRAININGS / CERTIFICATIONS**

---

- IOS development, 06/01/20, 08/31/20, udemy, Virtual, Have a Beginner level knowledge in Swift Programming language, made apps through Xcode, know how to Debug on Xcode and Host the App on IOS App Store
- Web Development, 04/01/20, 06/30/20, udemy, Virtual, Successfully Completed The course Of Web Development and learned how to Deal With Website, experience creating custom websites through my web knowledge such as Responsive Design, Front-End Systems, Debugging, Server Side Scripting. Expert in React Development, Proficient In JavaScript.
- SQL Certificate Of Completion, 03/01/20, 04/30/20, udemy, Virtual, Successfully Completed The course Of SQL (Structured Query Language) and how to Deal With SQL Databases And Also PostgreSQL
